●	Amplifier + Zumba speakers (chrome matt)	BMN70Easy-ZC	€ 449,-
	Amplifier	BMN70Easy	€ 255,-

# WiFi-Audiosets

Below you will find all audiosets that work on the basis of WiFi audio. WiFi audio has a longer range than Bluetooth. The larger the home network, the greater the range. You include these Amplifiers once in your home network. This can be done via WiFi, but even better via LAN. You can then immediately start streaming from, for example, the Spotify app on your mobile phone. Or use the app to listen to your favorite radio station. WiFi audio also offers you the possibility to combine multiple Amplifiers (read: rooms). Stream to 1 room or to all rooms at the same time. All speakers in these sets can be finished in white, black matt or chrome matt.

## Budget

## WiFi-Audioset

### Amplifier

Application	Multiroom / Singleroom
Power	2x30 Watt Max @ 8 Ohm
Protocol	WiFi-audio / DLNA / AirPlay

# Bathroom TV

Turn your bathroom into a real wellness area. This Smart TV gives you access to Google's App Store. Install Apps of your choice and enjoy, for example, Netflix, Youtube, Ziggo GO or KPN. Of course, a DVB-C and DVB-T2 tuner is also provided. Available as flush mounted and on-wall mounted model. The TV has WiFi for easy integration into your home network. In addition, a LAN Connection is also provided to include the TV wired in your home network.

The Bathroom TV comes with a Media-Box, which contains all connections and slots. The Media-Box is separate from the screen. This is how we keep the waterproof and non-waterproof components separate. Safety comes first!

The integrated speakers provide excellent sound reproduction. But it is also possible to combine the TV with one of the audio sets in this pricelist. For example, the sound of the TV is reproduced over the AquaSound speakers. The Audiolink cable provides the connection between the TV and the audio system. This cable must be ordered separately in the desired length.
